

Cheap shitty car Blues

Chris Grey & The BlueSpand

My daddy always told me - if you wanna be a star
All you need is a really cool car
The heat ain't working - so I guess my car is cool
But I'm wearing 2-3 jackets - when I take my kids to school

There's a black cloud hanging over all my cars
Don't know what it is - it must be written in the stars
There's always something wrong no matter which car I choose
That's why I got the cheap shitty car blues

Lent money from my mamma - even sold my wedding ring
And found myself a new car - I could hear the angels sing
One week later the car was back in the shop
It drives me crazy - why this bad luck won't stop

There's a black cloud hanging over all my cars
Don't know what it is - it must be written in the stars
There's always something wrong no matter which car I choose
That's why I got the cheap shitty car blues

Transmission broke down 3 times in one year
The battery exploded and now I'm living in fear
The brakes, the wheels, the horn, the heat there's always something wrong
That's why I wrote this song

There's a black cloud hanging over all my cars
Don't know what it is - it must be written in the stars
There's always something wrong no matter which car I choose
That's why I got the cheap shitty car blues
